

Exercise 3: Insurance Premium Calculator

Write a mobile app to calculate life insurance premium using the following data:

Age	Premium (RM)	Extra payment for male	Extra payment for smoker
Less than 17	60	-	-
17 - 25	70	50	100
26 - 30	90	100	150
31 - 40	120	150	200
41 - 55	150	200	250
More than 55	150	200	300

Use the following View classes to capture inputs from the user:

Input	View class
Age	Spinner
Gender (male or female)	Radio Button
Smoker or non-smoker	Check Box
